

Going Green

By Julia Quinn-Szcesuil

October 26, 2008

Acton, Mass. - The new group Green Acton is focusing on townwide approaches to saving energy and being environmentally responsible. According to Jim Snyder-Grant, a spokesman for Green Acton, the Board of Selectmen has indicated that working on green issues and sustainability was a top priority, but has lacked time and resources. Snyder-Grant said Green Acton will fill that need, by making suggestions for municipal government, residences, businesses, and schools throughout the town.
