

The Great Acton Energy Challenge

FREE

**Sign Up
by March 15 at
Sagewell.com/Acton**

Every house leaks energy. But where, and how much? That's your money radiating away from your home. The Town of Acton, Green Acton, and AB PIP STEM teamed with Sagewell, Inc. to offer a **FREE—No Obligation—Energy Analysis** to Acton homeowners and the Town of Acton.

How does the program work? Sagewell uses infrared technology to conduct non-intrusive mobile drive-by scans to reveal energy leaks in buildings. **If 400 households sign up by March 15, Sagewell will image the majority of homes and buildings in Acton.** Hurry, thermal scans work best when it's cold out!

How do I Sign Up for an Energy Scan? It's easy. Just visit sagewell.com/acton.

Once the test is complete, homeowners will receive a confidential password-protected analysis report and may choose to receive information and recommendations from local energy conservation suppliers for services, rebates and incentives.

Please tell your Acton friends & neighbors to take part in the Great Acton Energy Scan! More information at greenacton.org/infrared or sagewell.com/acton.
